

Date: 14 May 2021

Tactical Wireless Ltd (TWL) has launched a new Company in Scotland with Professor George Goussetis, Professor of Microwave and Antenna Engineering at Heriot Watt University. The formation of this company arose from a Scottish Enterprise supported project by George and his colleagues. The new company, which incorporated on 6 May 2021, is Tactical Space Systems Ltd.

George is Chairman of Tactical Space Systems Ltd. and Peter Morton, TWL's Chairman and CEO, is the Managing Director.

Tactical Space Systems will strive to be close to end users, to understand market requirements, and will also seek to develop strong relationships with cellular, satellite and other communications technology providers. Through understanding requirements and emerging capabilities, Tactical Space Systems will provide consultancy services, testing & evaluation of systems and the design and manufacturing of robust, resilient & cost-effective communications products. Initial priorities will be Rail and Health & Social Care but Tactical Space Systems will also exploit its joint expertise in other market sectors, as opportunities arise.
